[ofrilim](#)

A recent bootcamp graduate looking for a full time front-end web developer position. After many years in the cosmetics industry, I made a career-changing move and learned to code. I am a quick learner, passionate about coding and building beautiful and responsive applications. In my free time I volunteer at the She Codes organization, working on expanding my knowledge of web technologies and teaching Lambada. I began my studies towards Computer Science B.Sc at The Open University this year.

Education

9/2019 - 1/2020 **Web Development Bootcamp** at Coding Academy.
Intensive coding course (~600 hours) that covers all fundamentals of web development.
